EDUCATION

University of California, Los Angeles
B.S. Mathematics of Computation

Los Angeles, CA
Expected Graduation: 2029

PROJECTS

Text Analysis Project

Python, matplotlib, pandas

- Implemented Python code to run textual analysis between chat histories
- Used Matplotlibs for graphical visualization and pandas for appendix organization
- Analysis results were organized into a short academic research paper, following the IEEE format and guidelines
- Source code and final results presented using GitHub

Convenience Store Inventory System

Java, HTML/CSS

- Built a web-based inventory system using Java and data structure design principles
- Developed functionality for organizing product categories and records, including features such as reminders, predictions, and calendar views
- Gained experience in structured software development workflow and fullstack development

EXPERIENCES

Music AI Data Annotator

SoundWave Lab

(Remote) Shenzhen, China

Jul. 2026 - Oct. 2026

- Annotated around 500 music files per week for AI training, with tasks involving genre classification, instrumentation, musical structure analysis, and audio quality evaluation.
- Worked with AI prompts and evaluated the characteristic of different existing musical AI models.
- Communicated with project managers to clarify uncertain classifications and ensure annotations followed task-specific guidelines.

IB Math & Computer Science Tutor

WellPrepped Education

(Remote) Singapore

Apr. 2026 - Present

- Deliver one-on-one tutoring sessions for IB Mathematics and Computer Science students.
- Planned and collided course materials for the IB curriculum, later adapting them for more curriculums such as AP
- Provide real-time feedback and targeted problem-solving strategies, helping students strengthen conceptual understanding.
- Shadowed at the International School of Dongguan, speaking in workshops and delivering classes to mentor students with the IB courses, research papers, and college preparation.

SKILLS & INTERESTS

Technical: Java / Python / C++ / JavaScript / HTML&CSS / Calculus

Language: English (Native/Bilingual) / Mandarin Chinese (Native/Bilingual) / Spanish (Professional Working Proficiency)

Interests: Classical music / Music arranging
